

# SERVOMEX

## To whom it may concern

Please be informed that SERVOPRO 4100 gas purity analyser is being replaced by SERVOPRO MultiExact for the following measurements:

- O2 purity and control.
- Trace O2.
- Trace CO2.
- Trace N2O.

These measurements will only be available with SERVOPRO MultiExact.

The SEVOPRO MultiExact has a number of advantages: this is a fully digital instrument, the accuracy is higher than 4100, several additional measurements are available with TCD (e.g. nitrogen, argon, helium etc.).

We encourage you to place orders for SERVOPRO MultiExact rather than for 4100.
